Save BIG by giving your worn Tooling & Cutters extra lifetimes with our worldwide repair service, REYNOLDS'... **COMPLETE Tooling & Cutter RECONDITIONING PROGRAM®** **HOW IT CAN BENEFIT YOUR COMPANY !**

- ★ Generate Maximum Annual Savings★ Achieve Top Performance ★
- ★ Minimize Equipment Down-Time ★ Reduce Maintenance & Supply Personnel Time ★

1) **OUR RECONDITIONED PRODUCTS PERFORM LIKE NEW !**

Reynolds goes the extra mile in reconditioning your tooling or cutter blades ! We call it 100% guaranteed "good-as-new" reconditioning because we put your worn parts through the same manufacturing operations as we use to make Reynolds' new products. This way your reconditioned products LOOK & PERFORM like new. **BENEFIT** - Maximum usable life, superior machine performance, minimized downtime, and reduced Maintenance and Supply Personnel time = the greatest Annual Savings Possible !

2) **UNCONDITIONAL 100% GUARANTEE !**

Reynolds will repair or replace any of our products for any reason at any time so that your satisfaction is guaranteed. Period ! **BENEFIT** - your peace of mind and maximum savings !

3) **ALL WEAR SURFACES RECONDITIONED !**

NOT just "touch-up". COMPLETE RECONDITIONING for Tooling involves all wear surfaces and for Cutter Blades involves BOTH the cutting face and the inside face to remove ALL wear marks, rounded edges, burrs, chips, etc. **BENEFIT** - Your Tooling looks new and acts like new to maximize your production. Your Cutter Blades have the sharpest edge with the least carbide stock removed so that more reconditioning cycles (5-7, more than double one edge sharpening) are possible at maximum sharpness.

4) **SUPERIOR MIRROR POLISHING !**

After reconditioning, Reynolds re-surfaces and re-shapes key Tooling dimensions. For Cutter Blades, Reynolds MIRROR POLISHES BOTH the cutting face and INSIDE face of EACH cutter blade like new for the sharpest edge possible, a MICRO-SHARP EDGE*. **BENEFIT** - Your tooling & cutters last the longest time in service, minimize equipment down-time, produce the best quality products and use the least mechanic and supply room time.

5) **PRECISION TOOL & CUTTER MEASURING !**

Precise measuring determines if tooling or cutters would recondition to top performance. If not, they are retired before they fail and take up your time to replace. **BENEFIT** - Longer operating life at peak efficiency for maximum productivity and product quality.

6) **EASY 24-hr. ORDERING & FAST SHIPMENT !**

Reynolds maintains an Ordering & Technical Support line (FREE call U.S.A. & Canada 1.888.288.8378 or WORLDWIDE +1.860.283.8246), a 24-hour Fax line (FREE call U.S.A. & Canada 1.888.232.9723 or WORLDWIDE +1.860.283.0613), and 24-hour Electronic Data Interchange Order capability (from your computer system to our Order Administration computer system) for your order management ease. Completed products are individually bagged and cushioned for shipment - next day if desired. **BENEFIT** - Questions or emergencies are expedited day or night with fast shipment to eliminate downtime and maximize your production.

7) **NORTH AMERICA'S TOOLING & CUTTER SPECIALIST !**

Reynolds' uses today's latest manufacturing techniques and measuring technology to provide you with premium-quality NEW tooling & cutters and to COMPLETELY RECONDITION your worn parts "good-as-new" for all your critical applications. Reynolds has been manufacturing and completely reconditioning our products for large & small companies in dozens of industries since 1970. Each day, we solve problems for our customers and help increase their productivity. **BENEFIT** - Reynolds' puts its wide reconditioning experience to work for you saving you money and time like no one else can !

WE APPRECIATE THE TRUST YOU PLACE IN US FOR ALL YOUR RECONDITIONING NEEDS !
